

# FOUNTAIN HILLS FALCONS

February 17, 2011

To whom it may concern:

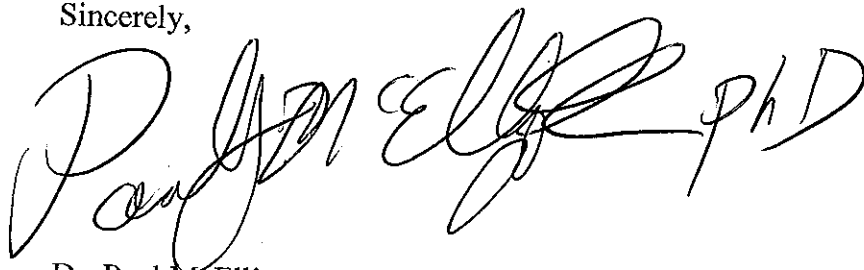

I have known Kenosha Drucker for the last five years as her instructor and club advisor at Fountain Hills High School in Fountain Hills, AZ. I have had Kenosha in my Honors Physics, and AP physics classes. In addition, she has participated in a number of clubs such as track, art and German. She was also a national Honor Society member.

Kenosha is a self- starter. She came in mornings at high school before classes on her own to study physics. She was an excellent student and received a 5 on the AP Physics exam.

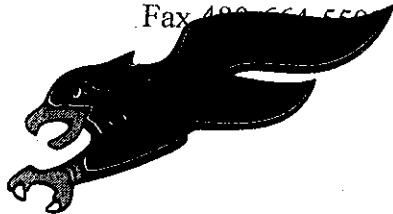

Kenosha has been developing her skills in applied science such as physics but she has also been developing her leadership abilities by leading a number of clubs. She has planned her activities and balanced sports, and other outside activities.

Kenosha is a most remarkable student, group member and sports participant. I cannot speak more highly of a student than I can of Kenosha Drucker. I would like to extend my strongest recommendation on Kenosha's behalf. She is an excellent student worthy of any higher education scholarship.

Sincerely,

A handwritten signature in black ink, appearing to read "Paul McElligott PhD". The signature is fluid and cursive, with the letters "P", "M", and "E" being particularly large and stylized. The "PhD" is written in a simpler, more legible font at the end of the signature.

Dr. Paul McElligott
